Helping you lead in delivering sustainable retail design solutions.
Sustainability in retail is one of the top trends for 2018.

Increase your sustainable design expertise with the support of Australia’s leading retail sustainable design experts.

Our online sustainability assessment software is specifically designed for retail fitouts.

Our performance benchmarking service is the only one of its kind and built on the data and outcomes of over 1,000 retail tenant assessments across Australia.

Our design support service and software has delivered, on average:

- 30% lower energy consumption (reducing operating cost and often avoiding expensive air-conditioning variations).
- 10-15% lower fitout costs (and de-fit benefits).
- 30% increase in comfort (which is good for sales).

Gain insights on your design and simple solutions to improve design performance for your clients.
Simple, engaging and effective.
Making sustainable energy efficient low carbon design interesting and accessible.

Value proposition

- Know how your design compares to the competition and get recognition for it.
- Demonstrated payback of service cost.
- Demonstrate the benefits of your design to your clients and align with their sustainability goals.
- Enhance your sustainable design skill set.
- Flexible options.

Key Features

- Benchmarks cover all retail types.
- Online for 24/7 global access.
- Thousands of pre-defined materials and assemblies.
- Visual palettes and material selection guidance.
- Cost effective with options from full self service to full support.
